DESCRIPTIVE
CATALOGUE OF

ORCHIDS

CHARLESWORTH & CO.,
Heaton, Bradford.

Presented to the L. H. Bailey Hortorium
by the Missouri Botanical Garden, 1972.

307.6
771

INTRODUCTION.

IN issuing this Catalogue, we beg to thank our numerous patrons for their past esteemed support.

Our increased Stock, and the large circulation to which our Catalogue has attained, makes us again curtail descriptive matter, but the full particulars of Plants are given as hitherto, the arrangement having proved so satisfactory to distant clients.

All orders will be taken in strict rotation.

Plants delivered immediately on receipt of order, subject to being unsold.

All Plants GUARANTEED TRUE TO NAME and description; should any customer, on receipt of Plants ordered, be in any way dissatisfied, the Plants may be returned to us.

If, by accident, any Plant flowers untrue to name and description, the purchase money will be refunded, with five per cent. interest added, and no further claim admitted.

The paintings of several of the very choice Plants can be seen on application.

In sending order by post or telegram, it will be sufficient to quote numbers in Catalogue.

Telegraphic Address:—

“CHARLESWORTH, HEATON, BRADFORD.”

Electric Cars from Forster Square, Bradford (outside Midland Station), run to Heaton, passing the Nursery.

Extract "GARDENERS' CHRONICLE," October 11th, 1902.

"NURSERY NOTES."

THE Orchid Nursery at Heaton, Bradford, is one of the most remarkable, complete, and successful horticultural concerns of modern times, and one in which the ideas and methods have been worked out with care, observation, and experiment by Mr. J. CHARLESWORTH himself. On several occasions we have noted the remarkable vigour and general excellence of the stock of imported species and of hybrids, the outcome of the larger part of the efforts at Heaton; and of late years it has been stated that a great deal of the success is due to the use of leaves in a decaying state in the potting material, together with a prescribed method of using it. The question now being of great importance, we paid a visit to the establishment, and full particulars respecting the potting material and matters relating to it were kindly given, which we hope to recount in a special note on the subject shortly. For the present it will suffice to give a brief description of a few of the matters we noted there.

Although importing orchids, and especially *Odontoglossums*, through their own collectors it was easy to see that the great and increasing industry of raising new orchids from cross-fertilized seeds is the more important branch of the business. . . . A very noticeable feature is that throughout the plant houses their occupants, both species and hybrids, are in vigorous health; hard, clean, and firmly rooted, and flowering or in a condition to flower, even in the smaller sizes, which would scarcely be expected to flower. One explanation of the healthy character of the foliage and abundant flowers is that they grow rather cooler and with more air than in other orchid nurseries, and sunlight is freely admitted, indeed this season little use, it is said, has been made of the lath roller blinds.

At the entrance of the Nursery new offices have been erected, together with an artist's room for taking pictures of good things and recording them as they flower. . . . etc.

VIEW OF ONE OF OUR ODONTOGLOSSUM HOUSES.

90	Brasso-Cattleya Heatonensis	<i>(Catt. Hardyana x Brass Digbyana)</i> . See Painting. All the Brass Digbyana crosses are very beautiful, but this one is particularly pleasing. Flowers of fine size; sepals and petals good breadth, rosy mauve with veins of deeper shade; lip of great size, the characteristic fringe of Digbyana is brought out strongly; margin rosy-mauve, the remaining portion a pleasing yellow, softening to white around the centre, and at the throat are streaks of crimson. Grand plant, 7 bulbs, all leaved, 1 strong lead Price on application			
91	„ „	DIGBYANO - MENDELII.	A handsome hybrid; flowers very large, pleasing in form; delicate rose-mauve throughout, with a soft greenish yellow area at the base of the large beautifully fringed lip. Magnificent plant, 10 grand bulbs, all leaved, 2 strong leads, 2 flower sheaths. Price on application		

Nos.

£ s. d.

- 92 **Brasso-Cattleya MOSSIÆ - DIGBYANA "HEATON VARIETY."** Flowers of fine size and shape; sepals and petals delicate rose-mauve; lip large, streaks of purple in front; between the rosy mauve fringed border and the throat is a distinct zone of white; the throat and base are of a soft yellow. Grand plant, 6 fine bulbs, all leaved, 1 strong lead Price on application
- 93 **BRASSO-LÆLIA "HELEN"** (*L. tenebrosa* x *Brassavola Digbyana*). Award of merit, Temple Show, 1902. Fig. Orchid Review, Vol. 10, p. 169. A beautiful hybrid; sepals and petals reddish brown, much like some of the forms of *L. tenebrosa*; lip of fine size, heavily fringed, pale rosy lilac, with distinct carmine margin; throat greenish yellow. Magnificent plant, 7 splendid bulbs, 6 with leaves, 1 strong lead and flower sheath 36 15 0
- 94 " " **PURPURATO-DIGBYANA.** Flowers large, sepals and petals of good size, delicate rose flushing on a cream white ground; a beautiful broad, fringed lip of slightly deeper rose, with a central streak of purple and lighter veins of the same colour running towards the cream-white base and throat. Magnificent plant, 7 splendid bulbs, all leaved, 1 strong lead 36 15 0
- 95 " " **"Mrs. M. GRATRIX"** (*L. cinnabarina* x *Brassavola Digbyana*). See *Painting*. A pleasing hybrid; flowers intermediate in shape, light orange yellow throughout; lip heavily fringed. Magnificent plant, 14 splendid bulbs, 12 leaved, 2 strong leads 3 3 0
- 96 " " Grand plant, 10 strong bulbs, all leaved, 2 strong leads 2 2 0
- 97 " " Very fine plant, 6 bulbs, all leaved, 1 strong lead 1 1 0

CYPRIPEDIUM ALBERTIANUM.

We beg to draw special attention to this fine lot of plants that have been raised from a special fine variety of Cyp. Spicerianum x with Cyp. insigne, Wallacei. It is a hybrid of splendid constitution and flowers particularly free, the blooms lasting an astonishing long period. For decorative purposes its flowers are invaluable.

CYPRIPEDIUM LEEANUM "SUPERBUM."

Special attention is drawn to this fine batch of plants. For condition they are unsurpassable; exceedingly free in habit, they give a beautiful display of bloom during the winter months, the flowers lasting a considerable time even when cut. We have never been able to offer this useful CYPRIPEDIUM at such low prices previously.

1887	Nice healthy plant, 4 good bulbs, well leaved, 1 good lead ..	1	1	0
1888	.. Adriane "DUCHESS OF CORNWALL."	F.C.C., M.O.S. One of the most distinct of the Od. Adriane section. Flowers large, partaking more to Od. crispum in shape; ground colour, a pleasing yellow, with numerous good sized and smaller blotches of bright chocolate red. The lip is heavily and prettily marked with the same colour. Splendid plant, 4 grand bulbs, all leaved, 1 specially strong lead	26	5	0
1889	Grand plant, 4 strong healthy bulbs, 2 with leaves, 1 strong lead and flower spike	26	5	0
1890	Fine plant, 3 strong bulbs, 2 with leaves, 1 strong lead	21	0	0
1891 "FASCINATOR."	This handsome variety so much inclines to the shape of Od. crispum, that possibly it is a natural hybrid between that species and Od. Adriane; heavily spotted throughout, bright chestnut-red. Grand plant, 4 splendid bulbs, 3 with leaves, making strong new growth	26	5	0

Nos			ℓ	s	d.
1892		Odontoglossum Adriane FASCINATOR. Extra fine plant, 3 grand bulbs, all leaved, 1 strong lead	21	0	0
1893	„	Adriane "IMPERIALE." A most superior form; flowers of fine size; spotting exceedingly dark and numerous. Splendid plant, 6 grand bulbs, 4 with leaves, 1 ex- ceptionally strong lead and flower spike	21	0	0
1894	„	"PALENS." A pleasing variety; good shaped flower, white ground, faintly spotted on sepals and lip; very distinct. Good plant, 4 very fine bulbs, 2 with leaves, 1 strong lead	10	10	0
1895	„	"ROSSEFIELD GEM." A pretty form, good shape, deep yellow ground, heavily spotted with chestnut-red. Fine plant, 6 strong bulbs, all leaved, 2 good leads ..	7	7	0
1896	„	ALEXANDRA REGINA. <i>See Painting.</i> A natural hybrid between Od. Schleiperianum and Od. grande. The plant is a strong grower and bears a spike of 9 and 10 flowers; shape, like a superior form of Od. grande; petals broad, yellow, half covered with bright cinnamon-brown; sepals, yellow, with heavy blotches of bright cinnamon-brown; lip, cream-coloured faintly marked with light brown. Very fine plant, 8 strong bulbs, 6 with leaves, 2 good leads	15	15	0
1897	„	„ „ „ Good plant, 5 strong bulbs, 4 with leaves, 1 good lead ..	10	10	0

2469	SOPHRO - CATTLEYA. CHAMBERLAINIANA (<i>Catt. Harrisoniae</i> x <i>Sop. grandiflora</i>). See <i>Painting</i> . A beautiful hybrid. Grand plant, 5 strong bulbs, all leaved, 2 good leads	0	10	0

Nos.				£ s. d.
2470		SOPHRO-CATT. EXIMEA	(Catt. <i>Bowringiana</i> x <i>Sop. grandiflora</i>). <i>See Painting.</i> A very interesting and pretty hybrid, perfect in shape and fairly intermediate; sepals and petals bright purplish-rose, the lip much darker, with a light yellow throat. The plant, although dwarf, has a splendid constitution, and is very attractive when in flower. Strong plant, 6 very fine bulbs, 5 with leaves, 1 strong lead.. .. . 26 5 0	
2471	,,	NYDIA	(Sop. <i>grandiflora</i> x Catt. <i>calummata</i>). <i>See Painting.</i> One of the finest results achieved with the use of the brilliant little <i>Sophronites grandiflora</i> . Flowers of fine size and exceptional substance; uniform dark scarlet; with numerous small purple spots on the sepals and petals. F.C.C., R.H.S., Nov. 12th, 1901. Splendid plant, 4 very strong bulbs, all leaved, 1 strong lead.. .. . 52 10 0	
2472		SOPHRO-LÆLIA EROS	(Lælia <i>elegans Turnerii</i> x <i>Sop. grandiflora</i>). <i>See Painting.</i> Flowers of fine size, wax like in texture; brilliant dark scarlet. Base of lip yellow, with scarlet lines. The front lobe of the lip bears a strong resemblance to some of the forms of <i>Lælia elegans</i> . F.C.C., R.H.S. Good plant, 6 good bulbs, 2 with leaves, 1 strong lead 42 0 0	
2473	,,	GRATRIXÆ	(Lælia <i>tenebrosa</i> x <i>Sop. grandiflora</i>). <i>See Painting.</i> A richly coloured hybrid, with flowers strangely like those of <i>L. tenebrosa</i> in shape, though much smaller. Sepals and petals purplish-red, tinged with orange-colour; lip purplish-red, with purple veining. The blending of the colour gives a glowing appearance to the flower and renders it most attractive. Strong plant, 4 very fine bulbs, all leaved, 1 strong lead .. 36 15 0	
2474	,,	HEATONENSIS	(Sophronites <i>grandiflora</i> x <i>L. purpurata</i>). First-Class Certificate, R.H.S., Oct. 7th, 1902. <i>See Painting.</i> A fine addition to this beautiful class. Flowers of good size; sepals and petals purple tinted dark scarlet; lip larger than in most other <i>Sophronites</i> crosses, reddish rose, with purple lines. Strong plant, 7 strong healthy bulbs, all leaved, 2 of which are strong leads 52 10 0	
2475	,,	MARIOTTIANA	(L. <i>flava</i> x <i>Sop. grandiflora</i>). <i>See Painting.</i> Strong plant, 4 very fine bulbs, all leaved, 1 strong lead.. .. . 5 5 0	
2476	,,	PSYCHE	(Sop. <i>grandiflora</i> x <i>L. cinnabarina</i>). A brilliant little hybrid, free in habit and profuse bloomer. Shape fairly intermediate, the colour is the brilliant scarlet seen in some of the best forms of <i>Sop. grandiflora</i> . Grand plant, 10 strong bulbs, all leaved, 2 leads .. 5 5 0

LIST OF SUNDRIES.

THE following articles are all of the finest quality, and we can highly recommend them; having used them ourselves for a number of years we can testify to their being absolutely indispensable for the good cultivation of Orchids.

LEAF SOIL COMPOST. We are prepared to supply the mixture as used by us, consisting of a proportion of leaves, peat fibre, moss, &c., made ready for use.
12/6 per Sack.

LEAF SOIL. Prepared ready for mixing with other material. **7/6 per Sack.**

SELECTED SPHAGNUM MOSS. Thick-headed and green, the best moss obtainable **3/6 per Bushel, 10/- per Sack.**

THE WEST POT-SHAPED TEAK BASKETS. Well recommended, very neat, well adapted for Cattleyas and Dendrobiums, **1½d. per inch**; as for instance, 4 inches deep by 4 inches across, **6/- per dozen.**

ORCHID PANS. Without side holes, only the small holes for suspending.

4	5	6	7	8	9	10	11	12 inches.
1/3	1/6	1/8	2/6	3/6	4/6	5/6	7/-	8/6 per dozen.

FLOWER POTS. Neatly made, very porous, a cheap and serviceable pot.

S72's	L72's	S60's	M60's	L60's	54's	48's	40's	32's
2½	2¾	3	3½	4	4½	5	5½	6 inches.
2/6	2/9	3/-	3/-	3/-	3/3	3/6	3/9	4/- per Cast.

CELLULOID LABELS. White Ivory Looking. These Labels are most attractive looking and very durable. 4in., **3/6** per 100; 5in., **4/-** per 100; 6in. **5/-** per 100.

LATH ROLLER BLINDS (our own Manufacture). They are neat in appearance, and whilst admitting the requisite amount of light, form the most effective shading possible. Further, they afford an excellent protection against frost during the severe weather. We have supplied several of the leading Orchid establishments with these blinds, which have given every satisfaction. We have had them in use ourselves for several years and calculate that these blinds have saved us 50 per cent. in canvas shading formerly used.

As we have considerably improved our plant for this work we can now offer them at **1/9** per square yard **Unpainted.**

We shall be pleased to give further particulars on application.

Knight & Forster, Printers, Bradford.
